Nutritional Biochemistry (online) made simple By Dr Igor Tabrizian MBBS

This online course is (LIVE recorded) with all the relevant notes and the video presentation can be done as an elective or just for personal interest, without any assessments or certification. It is also recommended for those who are simply interested in learning more about the biochemical origins of illness and symptoms, to understand mechanisms of disease and how to effectively utilise nutritional medicine in your clinical practice or life to improve the health and well-being of your clients, friends and yourself.

Dr Igor Tabrizian has a natural ability to make a complex subject so simple that everyone will be able to follow and understand this fascinating topic of Clinical Biochemistry of Nutrition.

Features of the seminar include:

Seminar 1

- Diagnostic orthomolecular medicine and detailed analysis of trace elements, the amino acids and cholesterol metabolism
- Channelopathies, functional deficiencies and the importance of digestion in health and disease

Seminar 2

- Read a tissue mineral analysis (hair), with the view to solving clinical problems such as fatigue, diabetes, depression and other conditions
- Hormone regulation and interactions will be featured and the second of the workshops will also cover detoxification strategies for the well-being of your clients, family, friends and yourself
